Hands-On OS Skills: Five Tasks

Windows, Linux and macOS

Made with GAMMA

Task 1: Read your PC's specs

1. Search "System Information" in Start.

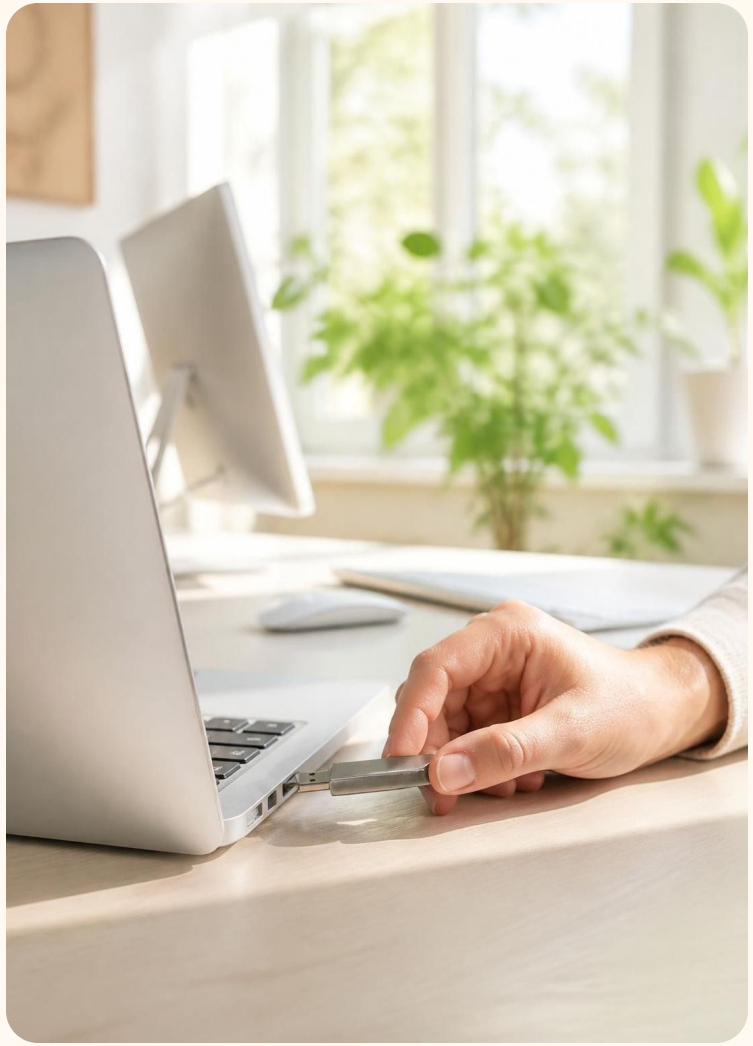

2. Find OS version, processor, and RAM.

3. Screenshot all three.

Made with GAMMA

Task 2: Make a bootable Linux USB

01

Download an Ubuntu or Fedora ISO.

02

Write it with Rufus or BalenaEtcher.

No USB? Use VirtualBox.

Back up the USB first. Writing the ISO erases it.

Task 3: Personalize macOS

1. Change the wallpaper.

2. Add Hindi or Gujarati in Language & Region.

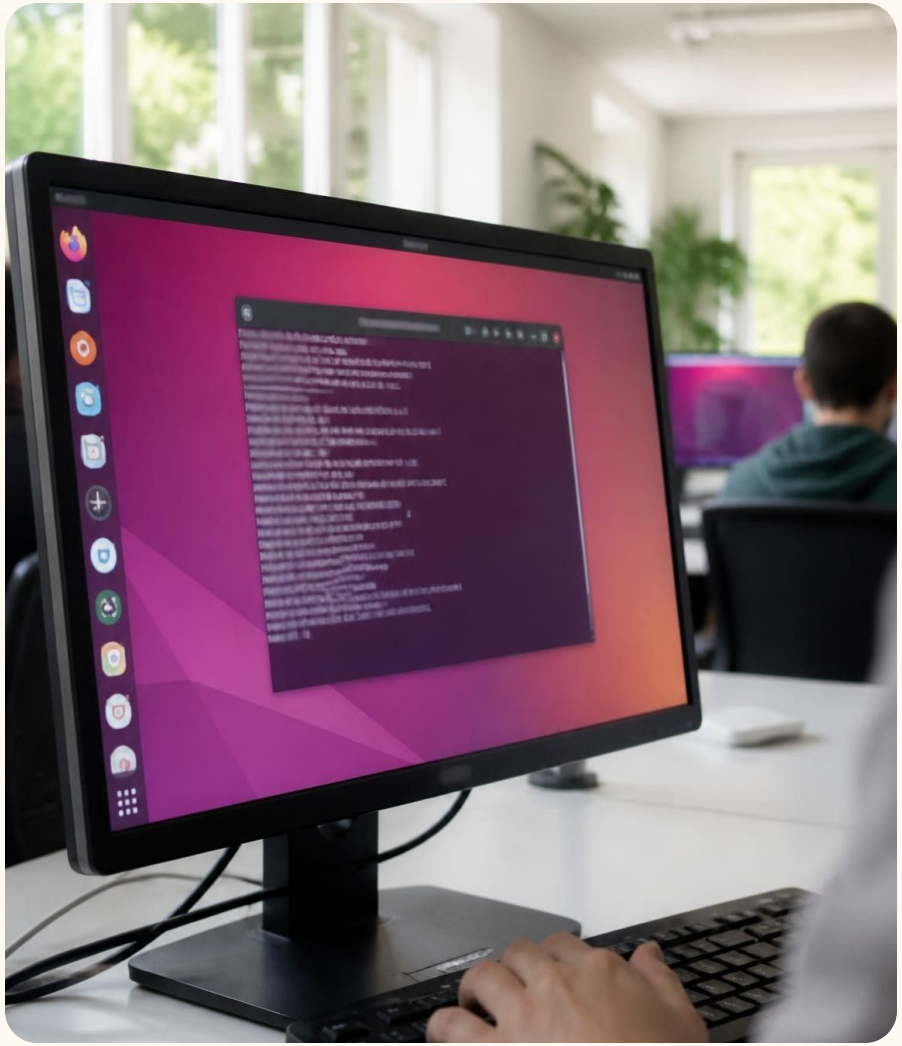

Made with GAMMA

Task 4: Ubuntu user 'gamer'

1. Install Ubuntu, create user 'gamer'.

2. Turn on automatic login.

3. Screenshot the login screen.

Task 5: ChatGPT's Windows 10 guide

Ask

Ask for steps, partitioning, privacy and update settings.

Try and check

Follow it and note unclear or missing steps.

Made with GAMMA

Check yourself

1. Where do you find your RAM in System Information?

2. Why does writing an ISO to a USB erase it?

3. Where do you add a new language on a Mac?

4. What is the risk of automatic login?

5. Which step in the ChatGPT guide was missing?

Made with GAMMA

Answers: questions 1 and 2

1 **Where do you find your RAM in System Information?** Under System Summary, see Installed Physical Memory (RAM).

2 **Why does writing an ISO to a USB erase it?** The image replaces the drive's contents to make it bootable.

Made with GAMMA

Answers: questions 3 and 4

1 **Where do you add a new language on a Mac?** System Settings, General, Language & Region, then Preferred Languages.

2 **What is the risk of automatic login?** Anyone who turns on the computer can open your account without a password.

Made with GAMMA

Answers: question 5

1. **Which step in the ChatGPT guide was missing?** Your answer depends on your run. Commonly missed steps: backing up your data, installing drivers, or activating the product key.

Recap

- RAM: System Information, System Summary
- ISO to USB erases the drive
- Mac languages: System Settings, Language & Region
- Automatic login skips your password
- Back up, install drivers, activate
